> THE SPRING SASSIONS. Opening Day in New York.

From the New York Herald, March 95] From the New York Herald, March 25]

Yesterday, contrary to all expectations, was favorable for the votaries of fashion, the spasmodic snow storm of the day before having passed without leaving a trace, save in the desper blue of the sky, and, consequently, they were cost in foll force, and throughout the day continued their labor of love with unshated and and industry, and the twilight found them comparing and classifying the different styles preparatory to all all decision. We have never seen a more successful opening or one that promised more satisfactory results; for, though some undecided characters vibrated, pendulum-like, between two extremes, the majority jumped to conclusions at once, and secured what struck their fancy.

Resmets.

Bennets.

The naw spring bonnets are the very prettiast we have ever seen, and we think it would be impossible to derise anything more becoming or in lister tasts. They are a great improvement over those worn has season, both in grace of outline and beauty of arrangement, both in grace of outline and beauty of arrangement, and we doubt not will be successful candidates for popular favor. Indeed we rather expect our fashions bies will be taken by storm this season; for the modistes have evidently made their calculations with that view and we think their arrangements are too perfect, and their plans too well digested to fear defeat. They can centrated all their strength on this effort, and the recentrated all their strength on this effort, and the relative are brilliant successful opening, such as we have not seen for many seasons.

The materials in the spring and summer bonnets are crape, obly, with stream and legionry, the trimmings.

to sixty dollars. It is as fine as isno, and the patterns as elaborate. But we must not imagine that in this establishment there are no shawls cheaper than the lamit for we have each very pretty plaid and striped Shetland shawls for are and eight dollars.

In the interest of our fair readers we have visited more than one establishment, and shall proceed to tail then the result of our labors. In Lord & Taylor's we were shown some splendid slike in corn color, pink, blue, like, and many other colors suitable for evening dress; some are rich corded groot de Paris and others plain you de sole; but all are five dollars a grand. The robest quality of black slike are coming into favor, and we have seen some heautiful specimens of this style that camot fail to be popular. Some according to the color, though not so much the rage as formerly, is still to be found in our stores. They have on schilbition in Lord & Taylor's a very degant white slik, embroid ared with iny banches of dowers, so small as to be imperceptible at a short distance. Turning from the last at an area of the macrofices of the stranger of the surface of t

imperceptible at a short distance. Turning from the of point d'alencon, consisting of cape, barbo, siere and bandkerchief. The vaine of the set was five hi and handkerchlef. The vaine of the set was five hun-dred and fifty dollars. In the same establishment we were shown a striking novelty in parasols which ren-ders them rather expensive articles. One was made of iffacistik, covered with white point de applique; the other white sik covered with Chantilly lace. In the same establishment we saw some beautiful Paris shawks, in new and corant designs, that sell fo-one hundred and seventy-five dollars, and Palely shawls, of the livest texture and richast borders, for one hundred and selventy-five dollars.

The Cornage. The different styles for the corange are so varied that choice is rather embarrassing, and, though all are equally prestry, yet all are not equally becoming to every for half a century, are now reduced to the nepreferring the quiet segance of the blanded shades of green and blue, others the gay and glowing beauty of the royal Sunsri tarian. Siredly speaking, here is not especial color in fashior; but now, as in every other control whist. The back of the corange is

In this important part of the dress we have as m

Fatal Foothardy Sent. A Chattanooga correspondent of the Detriot Tribune gives the following :

Tarse days ago a young man, whose name I did not learn, a private in the 78th Pennsylva-nia infantry, fell from that point of Lookout f some eighty feet, upon a kind of table that point where disaster commenced.

Nowhern once more in our possession, would is formed in the mountain, about that distance from the top. Of course he was killed. The had been to some expense in getting up stock evening of the 20th. The public presentiment the thinking classes, in this time of great popular struggle known to history, which impresses the intoxicating cup, and was often in a state of ing of that day. the intoxicating cup, and was often in a state of ling of that day.

drunkenness.

Gen. Hoke has struck a most effective blow

He had done this so often while drunk, that he got so careless as to do it while sober, and on the fatal day. I am told, he was periectly sober. In the presence of a lady and her husband, he stepped to the extreme edge and placed the palm of one of his feet on the edge, and attempted to bring the other with it, when a small piece of the rock broke off. It was enough to throw him off his balance, and sway him backwards, and precipitate him down the dixty hight. In mands a flotilla of cutters in the Cowan river. falling he attempted to catch the skirt of the lady's dress, but, with great presence of mind, When the unfortunate man was found he was quite dead. His neck and back were broken,

iterally snapped in two. The Burnside Expedition—Its Destination Solved. From the Richmond D'soutch, 22.]

erday dispels the doubts as to the probable coint from which the great Burnside armada is to commence its operations against Richmend.
On Wednesday ten gunboats and three transports ascended the Rappahamock river as far as Boulware's ferry, ten miles below Pappahamock, Essex county. They were accompanied by a machine known as the "devil," which was

The New York Times of the 18th has the folowing article, under the above head, referring to the preparations made by the Red river expedition. It is important, as showing the mag-

nitude of the force defeated by Gen. Taylor: Not a few mee and women may be supposed to be endgeling their brains about this time, to see if they cannot strike out some light concerning the meaning of the extensive military maneuvers going on in Western Louisians. Beside the heavy force, military and naval, which Gen Smith took down the Mississippi and up the Red river capturing Fort Do Russey and pushing on to Natchitoches, we have had news that Gen. Banks, with a very large cavalry force and a small infantry accompaniment, had passed up once more through the descried Opeousas country, and was trying to effect a nine tion with Smith, when he was attacked by the the arrival of the Confederate steamer Florids at Remsrebels on Cane river. In addition to those two l-dies, Caba, on the lith last. Several Union guaboute columns on the Red river, or trying to get there, had started out to overtake her. army of the frontier, that eight regiments and a battery, under Gen. Theyer, left Fort Smith, Arkansas, on the 21st nit., destined also for the Red river; and this body was to be joined in Southern Arkansas by a fourth army, from Little Rock, under Gen Steele who was also that point bound for Rad river. The entire force of those

number about forty thousand men. This is an opportunity army to operate with on the Red river, and the country will look with of his department. ntense interest for its achievements. The rebeis thereabouts have, of course, no force to cope or to compare with this. What force they have ought to be devoured very quickly; and then want will our army of 40,000 men do? They caunot march aeress the vast spaces of Tozas, and they certainly exent be retained in Western Louisiana, for Gen. Banks' various fruitless marching and countermarchings through that fatal region have siready cost us enough and enermously in blood and treasure. It is not worth while to divide such a splendid army up nto mere post holders and guerrilla hunters, when troops are so imperatively demanded for great operations in front of the national capital. It was given out some time since that Gen. Grant would speedily withdraw all white troops from the Department of the Guit, except such as were needed to thold New Orleans, and it is sossible that this concentration on the Rad rivr of all the trans-Mississippi forces may be fol lowed by that step. Furty thousand additional men in Virginia might turn the tide of sear this smmer, and crush forever the head of the Jeff. Davis confederacy. It would be a fearful thing were we defeated in front of Richmend.

The Sudden Size in Gold-Arrival of Sec-From the New York Herald, 15th.]

The sudden rise in the gold market for the past law days began to have its effect upon all oranches of commercial business, and people began to think that the fabled stories of the sufferings of the Southern people were about being realized by the working classes of the North Butter, one of the most essential necessaries of demestic use, has, under the inflated condition of the money market, riseu to such a figure as to entirely exclude its use at the frugal board of the mechanic and day laborer, and many fami-The different styles for the corange are so varied that lies who have heretotore enjoyed all the duxuries cessity of dispensing with all articles that are the United States in this war. He says: Pointed waists are made with the not solutally necessary to sustain life. In view loy his magic wand, which can turn paper he equilibrium of exchange, by throwing all the gold in the sub-treasury upon the market, sconer or later awaits a nation that is false to toping that by this means he may be able to advancing civilination restore confidence, and create a market for the cale of 10 40's, which are now the hope of the prosecution of the spring campaign, about to

> and did not appear on 'change during the day; but his arrival in the city being well known by which, as a cardinal principle, denies the Word the operators in gold, they were naturally anx- of God and the sanctities of the marriage relaious to discover the object of his visit. The stion to millions of its subjects? or does it save rumors that were aflest during the day were its indignation for the authors of "essays and various; some would have it that he came for the purpose of "bearing" the market by throwing Where are the men whose voices ought to ring all the gold in the auti-treasury into Wall street. like clarious among the hosts of their brothree and by that means to make the speculations of in the free States of the North? some of the recent operators so unprofitable that they would in future lessitate to embark in diffusion of knowledge, while the question is of such an uncertain enterprise. Whatever the enforced perpetual ignorance as the cement of object of Mr. Chase's vinit may be, it has had that unballowed structure with which this ninestreet. Very little business was done in the of tyrannical beadles and heariless schools

defeat, they prophecy that gold will reach such Where is the laureate, so full of fine indignal a figure as to almost render greenbacks worth- and high aspirations ! Has he, who holds so less. Daring the day, yesterday, the secretary cheap those who waste their genius reliable information on the subject, Mr. Chase preferring to keep his own counsel. A short ime, however, will reveal the whole matter, and in the meantime every fluctuation in the
